About Our Class!

Exposing them to have a better understanding of how things in the environment affect each other by knowing their **life cycles** and **habitats**, and discovering the **science of life** at an early age.

Numeracy vocabulary and **counting** by 1s, by 2s, then 3s and connecting this counting to **group numbers** and incorporate addition, division and multiplication. They were also exposed on different shapes and allowing them to understand that each shapes has its own **measurements** and **patterns**.

Enhancing their **literacy** skills by mastering **letter sounds** and **sound blending** allows them to begin accurately decoding written language and teaching themselves new words and help them to read unfamiliar words.

WE ARE LEARNING

WE ARE EXPLORING

WE ARE DISCOVERING

A1 MEMORIES

A picture is worth a thousand words, but a memory is priceless!
