Embrace Progress

Unlocking the Power of Alphabets

Let's dive into the exciting world of letters! In our recent sessions, we explored the sounds associated with letters A through O. This included a combination of fun activities where students practiced enunciating each letter while tracing both uppercase and lowercase forms. Our students showed incredible enthusiasm as we introduced the letters P and Q. They eagerly immersed themselves in the new sounds and vocabulary, discovering words like "penguin" and "queen," which sparked their imagination and curiosity.

To further enhance their vocabulary retention, we incorporated an engaging educational game that transforms word memorization into an adventurous experience. Students participated in activities that not only reinforced their understanding of the letters but also encouraged teamwork and collaboration.

Shapes

In our lessons about shapes, we focused on naming and recognizing various geometric figures such as circles, squares, triangles, and rectangles. Students practiced tracing these shapes, honing their fine motor skills and developing precision in their movements. To make learning more interactive, we encouraged them to identify and draw shapes using colorful markers, matching each shape with its corresponding color to enhance visual learning.

Numbers

We journeyed through the numbers 1 to 15 together, engaging in an interactive counting experience. The children absolutely love the counting song, "Count to 100" by Singing Walrus, along with the upbeat "Numbers 1-20 Song." Singing along not only makes learning enjoyable but also deepens their understanding of numerical concepts and improves their ability to count quickly and accurately.

Furthermore, we incorporated game rules into our lessons to improve academic skills and foster social interactions among peers. As they participated in counting games, they learned to take turns and support each other in learning, building a strong sense of community.

In addition, we started practicing tracing their names, which is a fantastic way to develop their handwriting skills while cultivating a sense of ownership over their work. We also introduced songs like "Please and Thank You" by Singing Walrus and "The Greeting Song" by Maple Leaf Learning. These songs teach the importance of politeness and the basics of social interaction, enriching their social skills and encouraging respectful communication.

Extra Information

Halloween 2024

Date: Saturday, October 26th, 2024 (If it rains, Sunday, October 27th)

Time: 12:00 PM – 16:00 PM

Location: Hayama International School

The theme will be Monster Pop Carnival, and we aim for a colorful and pop party

Upcoming

October 25th

Preparation day
(No School)

October 26th
