AI'S LEARNING JOURNEY!

This arts and crafts lesson provides children with a unique opportunity to express their creativity by designing and producing their own products. Students will engage in hands-on activities, allowing them to create items they wish to sell in our setup market in the classroom. This experience not only fosters artistic expression but also teaches fundamental skills in entrepreneurship, such as product development, counting, and customer interaction.

AI'S LEARNING JOURNEY!

Enhancing sentence composition skills!

Kids will learn to construct clear, concise sentences that effectively convey meaning. By engaging in this practice, students will improve their overall writing proficiency, ensuring their ideas are communicated with clarity and precision.

The "**Buddy Up System**" enhances the experience of reading by encouraging students to engage in literature together. This collaborative approach fosters discussion, accountability, and deeper understanding of the material. Kids are paired based on their reading interests and goals, making it easier to share insights and challenges.
