APRIL
2025

Look What We Will Learn

LANGUAGE ARTS

Unit 1 Getting to Know Us

We will learn short vowel sounds (a, i, o) and practice r, l, and s blends. We will focus on finding key details in a story to better understand what we read. In grammar, we will learn what makes a complete sentence, including starting with a capital letter and ending with punctuation.

MATH

Unit 1 Numbers All Around Us

As an entry point to the study of mathematics in first grade, Unit 1 works to establish classroom standards around exploring and communicating about numbers. Its mathematical focus is the development of number sense and number combinations (with emphasis on combinations to 10).

SCIENCE

Gravity and Motion-

During this unit of study, we will explore motion by understanding the effects of push, pull, gravity, and force on objects. We will also learn how our bodies move and how we use different forces to make those movements happen.

SOCIAL STUDIES

This month's focus will be on exploring the concept of rules and how they enable us to play, learn, and stay safe with our friends while using our bodies in various ways.

Reminders

- Please make sure all of your child's belongings are clearly labeled.
- Ensure your child has a hearty breakfast each morning so they're energized and ready for the day.
- If you have any questions or concerns you'd like to discuss during orientation, please let me know ahead of time so we can plan accordingly.

Upcoming

- Orientation - April 18
- Beach Clean Up - April 22
- No School - April 29
