

JULY NEWS @ A5

We finished reading Wonders Unit 2, while learning more about consonant digraphs, long vowel digraphs, root words and their prefixes and suffixes.

Math has become more fun and meaningful, as we discovered more practical applications of Math concepts in Area, Fractions, Measurement, and Treatment of Data.

We were so amazed at how we could integrate Science and Arts, as we successfully completed activities such as Plane Throwing (investigating on motion and speed), Rollercoaster Challenge, and reporting on Energy Flow. But of course, we crafted artworks that matter to us, such as the Father's Day poster.

Happy Birthday, Shun!
Farewell, Akina & Will...

Other Activities

Flight Attendant Special Class

Viewing an Art Exhibit (Ms. Rune's)

Earthquake Drill

Sports Day!

The HAYAMA International School

Class A5 2025-26 Family
