

OCTOBER NEWS @ A5

Thank you for visiting
our Learning Fair 2025!

We are discovering more story characters, both real and fictional, worthy of admiration and emulation. We are learning about leadership, justice, and generosity.

"Money, Time, Age, and Distance Problems?" We're not daunted by them. We solve them! The various strategies with practical applications we are learning to solve math story problems make "managing" those problems fun!

Besides learning about the History of the Art of Weaving, we also asked questions and discussed the SDGs, specifically SDG 12 (Responsible Consumption & Production).
