OCTOBER 2025

A7 GRADE - 2

OUR LEARNING FAIR 2025

Our Learning Fair this year was amazing. The students proudly shared what they learned in all subjects. I was so impressed seeing how confident and creative they were in expressing their knowledge. It reminded me how much they've grown since the start of the year, not just academically but also in their confidence and teamwork.

IMPORTANT DATES

October 3- Learning Fair

October 13 - No school Sports Day

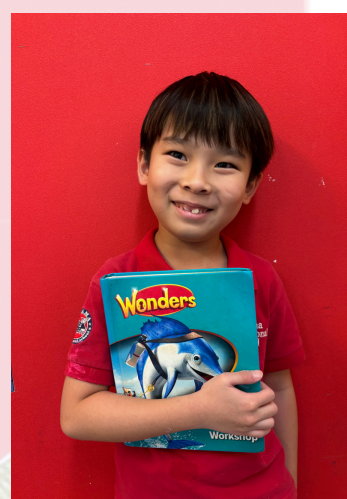

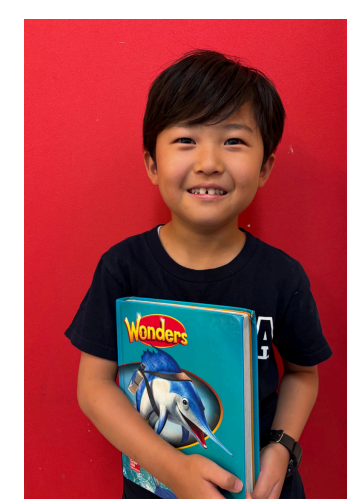

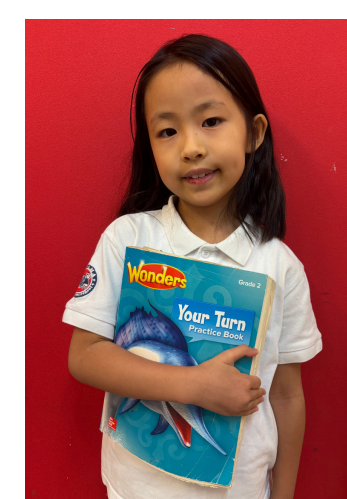

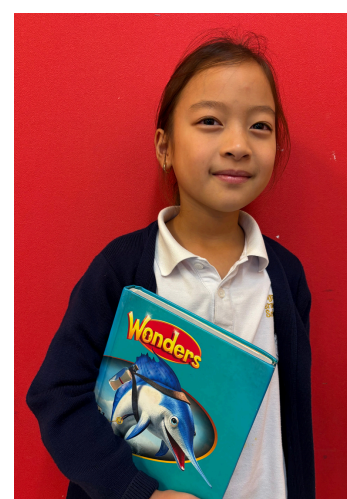

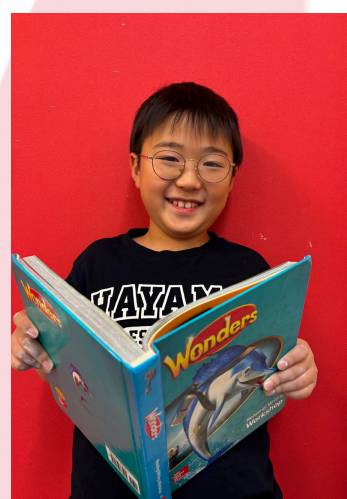

October 14 - Elementary Fire Prevention Class

October 17 - No school Teacher's Preparation Day

October 24 - Halloween Party

A7 STUDENT PREPARATION

I truly appreciate how dedicated the students have been in preparing for the Learning Fair. They practiced every day, reviewed their lessons from the first and midterm terms, and helped each other when needed. I am very impressed with their focus and teamwork. Their effort shows how proud they are of what they have learned and makes me very happy to see them grow as confident learners.

OUR CLASS

OCTOBER 2025

A7 GRADE - 2

READING PRACTICE

After completing our weekly stories from Units 3, the students work together to use new vocabulary by making their own sentences in English.

This activity helps them understand word meanings and how to apply them correctly in sentences. It also allows them to share ideas, cooperate with their classmates, and practice speaking and writing in English. Through this routine, they are becoming more confident and independent in using the language.

OUR ACADEMICS

We finished Language Arts Unit 3 and are now working on Unit 4, Our Life and Our World. The students are learning a lot about expressing their ideas and connecting them to real life. I love seeing their curiosity and how they relate the lessons to their own experiences, it makes the learning more meaningful.

We are in Math Unit 4, Module 4 Thinking in Threes. Students are working on problem-solving and finding patterns. It's exciting to see how they tackle challenges with creativity.

This month, we are learning about nature and weather, which connects nicely to our Language Arts lessons. The students are curious and ask many questions about the world around them.

We are focusing on cleaning the environment and taking care of nature. The students understand why it's important to help preserve it. Seeing their care and enthusiasm gives me hope for a future generation that values our planet.
