

NOVEMBER NEWS @ A5

LANGUAGE ARTS

As we approach the end of Wonders Unit 3, we encountered historical figures whose acts of service to humanity and social justice have inspired us. We also learned about various inventions that took inspiration from Nature. In grammar and writing, we learned about adjectives, prefixes, and suffixes, as well as text main idea and details.

MATHEMATICS

How many millimeters are there in 1,500 kilometers? How many miles have you run if you finished a half marathon? What is the perimeter of a regular pentagon with one side measuring 5cm?
The 3rd graders can quickly give you the answers!
How about finding the sum of $67/21$ and $21/35$? What is their least common denominator?
How do you find the area of a right triangle? Ask our 4th grade math wizards!

ARTS & S.T.E.A.M.

Since it's Halloween season, we crafted "glass jars" that trapped some spooky creatures in the enchanted forest. In STEAM, we tried to build miniature bridges and pasta noodle towers that could hold heavy objects... and we did it!

FIRE PREVENTION CLASS

Yokosuka City Fire Department, South Fire Station, West Branch (14 Oct 2025)
