JANUARY 2026

A7 GRADE - 2

## SPEAK WITH PASSION

This month, we began preparing for our Winter Term News Broadcasting. The students are very excited to take on the role of news casters and learn how to speak clearly and confidently in front of others. They are practicing proper pronunciation, voice projection, and simple sentence structure while learning how to deliver information in an organized manner. This activity encourages them to build confidence, improve their English communication skills, and express their ideas more naturally.

## IMPORTANT DATES

- January 5 - Preparation Day (No School)
- January 6 - First day of Winter Term
- January 8 - Photo Shoot Individual
- January 12 - Coming of Age Day (No School)
- January 22 - Photo Shoot Class Picture and School Picture

## HAPPY NEW YEAR 2026

A7 students were very happy to be back at school and start the year together. During the first days of class, we shared stories about what we did during the winter break. The students enjoyed talking about their holidays, family time, trips, and activities, which helped them reconnect with their classmates and practice speaking in a relaxed and comfortable way. Celebrating new year with our poster making theme “Play, Think and Learn”.

# OUR CLASS

JANUARY 2026

A7 GRADE - 2

## SCIENCE PROJECT

For our Science project, we focused on the question, “How can we protect the Earth?” The students shared their ideas and discussed different ways they can help care for the environment. They created messages advocating for protecting nature, especially the importance of planting trees before cutting them down. We also talked about simple actions such as reducing waste, saving energy, and keeping our surroundings clean. This project helped students develop environmental awareness and understand that even small actions can help protect our planet.

## OUR ACADEMICS

Academically, we are now in Unit 5 Week 4 for Language Arts Wonders. The students are learning new vocabulary and sound patterns such as au, al, ough, augh, and aw. They are practicing these sounds through reading, writing, and spelling activities to strengthen both their decoding and comprehension skills.

In Math, we continue working on writing numbers in words and solving addition and subtraction problems with more confidence. We have also started advanced learning with two-digit multiplication, allowing students to challenge themselves and apply their mathematical thinking in more complex problems.

We are proud of the students’ positive attitude and strong effort as they begin the new year, and we look forward to more learning and growth in the coming weeks.
