Group Presentation

Students confidently presented their research findings to the entire elementary department, demonstrating strong communication skills and a clear command of their subject matter. Because the topic held personal significance for them, students were intrinsically motivated throughout the research and presentation process. This intrinsic motivation was evident in the depth of analysis, thoughtful organization, and clarity of delivery displayed in each presentation. Collectively, the presentations reflected not only a solid understanding of the content but also a genuine sense of enthusiasm and ownership over their learning.

Guest Speaker - Mr Haruyama

We were delighted to welcome our guest speaker, Mr. Haruyama, a Certified Public Accountant (CPA), who shared his expertise with our students on investing and wealth creation. Students were fortunate to hear directly from a professional working in the field, gaining real-world insights into how money, markets, and long-term planning connect. His talk strongly complemented our Learning Fair and our current stock market project, helping students see how classroom learning applies beyond school. While there is still much more to explore, Mr. Haruyama's visit helped connect many important dots in our learning journey and sparked thoughtful questions and discussions.

Graduation Trip

Our Grade 6 graduation trip to DisneySea was a truly special experience and a perfect way to celebrate the end of our elementary school journey. We are deeply grateful to the school and our parents for their incredible support in making this unforgettable event possible. The day was filled with laughter, excitement, and shared adventures, giving students a wonderful opportunity to deepen friendships and strengthen connections with classmates. From enjoying thrilling rides to exploring the park together, everyone had so much fun and showed great cooperation and positivity. Most importantly, the trip helped create lasting memories that students will carry with them as they move on to the next stage of their learning. It was a joyful celebration, a meaningful milestone, and a reminder of the strong community that surrounds and supports our students.

Calligraphy

Students learning Japanese calligraphy practice focus, patience, and cultural respect. Through brush control and mindful repetition, they strengthen fine motor skills, creativity, and discipline, gaining confidence while connecting language, art, and tradition in a calm, reflective learning experience for students.

Setsubun

The Setsunan fun activity gave students a wonderful opportunity to have fun while experiencing a traditional Japanese event. Through hands-on activities, laughter, and shared experiences, students learned about Japanese culture in an engaging and meaningful way. It was a joyful occasion that helped build cultural understanding, strengthen friendships, and create memorable moments beyond the classroom.
